Profile

I am a master's student in Data Science with one year remaining in my studies. I have experience working with Python R and SQL, including data cleaning, analysis, and building small tools to support technical tasks. I approach data work with structure and curiosity—whether it involves debugging, supporting digital workflows, or performing smaller analysis tasks. I'm motivated by using data and technology to create meaningful solutions and look forward to contributing my skills in a hands-on and learning-oriented role.

Work

Substitute at Børnehuset Ebberup, Ebberup

April 2024 — current

As a substitute in kindergartens and nurseries, I've gained valuable experience in communicating clearly, adapting quickly, and resolving challenges in dynamic settings. Supporting children and teams in unpredictable situations has taught me how to stay calm under pressure, assess needs, and find constructive solutions. These skills have strengthened my ability to collaborate, take initiative, and contribute to inclusive, people centered environments.

Internship at JKS A/S, Kolding

February 2023 — Juni 2023

During my bachelor's studies, I interned at a staffing agency where I handled phone calls, booked temporary staff, managed emails, and supported the team with ad hoc tasks and onboarding of a new colleague. This experience strengthened my communication skills, taught me to work efficiently in a fast-paced environment, and sharpened my ability to explain processes clearly and patiently.

Education

Master's in data science, University of Southern Denmark, Odense

September 2024 — Current

Bachelor in Public Administration, UCL Erhvervsakademi og Professionshøjskole, Odense

September 2020 — January 2024

Volunteer work

Somali Student Organisation (SSO), Odense

September 2023 — Juni 2025

I was a board member of the Somali Student Organization(SSO), a community dedicated to empowering young Somalis in the diaspora and in their home country through professional skills and international collaboration. The network motivates youth in the diaspora to create opportunities and development in their homeland, builds a global Somali network of professionals and students, and fosters a strong social community among young Somalis. Additionally, it bridges the gap between students and professionals by creating an accessible support network to help each other academically and professionally. In this role, I was responsible for planning, directing, and organizing events and larger projects, as well as participating in strategic meetings.

Project leader at Red barnet Ungdom, Odense

January 2022 — Juni 2024

I was a project leader in a friendship group, where I oversee the volunteers. This role involves creating strong structures and stable frameworks for both the children in the friendship group and the volunteers. Additionally, I am co-responsible for collaborating with the Red barnet ungdom secretariat to ensure that the friendship group's budget is adhered to. This volunteer work has given me the tools to take on a leadership role and to bring RBU's values, vision, and goals to life.
