

Cand in Data Science

I am pursuing a master's degree in data science at the University of Southern Denmark (SDU). I have experience with Python, R, and SQL, focusing on data cleaning, visualization, and machine learning. Through academic projects, I have developed tools for web scraping, statistical analysis, and interactive dashboards. In addition, my volunteer and work experience has strengthened my teamwork, leadership, and communication skills. I am motivated by solving complex problems and creating data driven solutions that bring real value.

Key Competencies

Project Management	Data Cleaning	Python
Teamwork	Statistical Modeling	R
Communication	Web Scraping (Selenium)	SQL
Problem-Solving	Data Visualization (Dash, Matplotlib)	Machine Learning

Language

*Danish: **Native***

*English: **Full Professional***

PROJECTS

University of Southern Denmark

2024

Analysis Speech - Python

Developed a full pipeline for scraping, processing, and visualizing political speech data using Selenium, pandas, and Dash. Automated collection of 200+ speech transcripts with metadata (dates, speaker tags, timestamps), stored in CSV and TXT files. Built preprocessing pipeline to clean transcripts, apply POS-tagging, and extend dataset with enriched linguistic features. Created an interactive Dash dashboard with keyword search, timeline visualization, word clouds, and transcript viewer

Skills Obtained: Web Scraping & Browser Automation (Selenium), Data Cleaning & Processing (pandas, Regex), Natural Language Processing (POS-tagging, text preprocessing), Data Visualization & Dashboards (Dash, word clouds), Problem-Solving & Debugging with unstable web layouts

University of Southern Denmark (SDU)

2025

Multivariate Statistics Poster – R

Conducted statistical analysis of 56 anacondas' biological measurements (length, weight, gender) using multivariate methods in R. Verified assumptions of multivariate normality through Mahalanobis distances and Q-Q plots. Applied Hotelling's T^2 test, confirming significant differences between male and female anacondas. Performed Box's M test to evaluate covariance structures, showing marginal evidence of differences. Summarized results in a professional poster presentation created from R Markdown.

Skills Obtained: Multivariate Statistics, Data Preparation & Cleaning, Statistical Assumption Testing, Data Visualization, Scientific Communication.

Personal Website - HTML

Designed and developed a personal portfolio site to showcase projects, experience, and skills, deployed it using Netlify, ensuring responsive layout and easy navigation. Integrated realtime links to GitHub and Live Demos for hosted projects and provided download link for CV and contact info for networking. Used about section and volunteer / experience sections to highlight analytical mindset, teamwork, leadership, and communication skills.

Skills Obtained: Web Development, UX / UI, Deployment & Hosting, Personal Branding and Content Organization, Communication & Self-Presentation

EDUCATION

University of Southern Denmark (SDU)

Master
Cand In Data Science
Campusvej 55, 5230 Odense M.

Sep. 2024 - June. 2026

UCL Erhvervsakademi og Professionshøjskole (UCL)

Bachelor's
BA in Public Administration
Seebladsgade 1, 5000 Odense C.

Sep. 2020 - Jan. 2024

VOLENTARY WORK

Somali Student Association (SSO)
Board Member

Aug. 2023 - June. 2025

I was a board member of the Somali Student Organization (SSO). The network motivates youth to create opportunities and development in their homeland, builds a global Somali network of professionals and students, and fosters a strong social community among young Somalis. Additionally, it bridges the gap between students and professionals by creating an accessible support network to help each other academically and professionally. In this role, I was responsible for planning, directing, and organizing events and larger projects, as well as participating in strategic meetings.

Skills Obtained: Project Management, Leadership, Event coordination, Collaboration & Communication.

Red Barnet Ungdom
Project leader

Jan. 2022 - June. 2024

Led a friendship group by coordinating and supporting volunteers, ensuring a safe and inclusive environment for children. Established stable frameworks and structures that strengthened group activities and volunteer engagement. Co-managed collaboration with Red Barnet Ungdoms secretariat, ensuring compliance with budget and organizational goals. Promoted RBUs values, vision, and objectives through effective leadership and project management.

Skills Obtained: Leadership & Volunteer Coordination, Project & Budget Management, Strategic Collaboration with NGO, Organizational Development & Community Building, Communication & Value-driven Leadership
